

The XYZ Wear Corporation plans to develop (from system analysis to operation testing) the web site for selling wears through Internet and to form the new whole system as follow:

## Topic 2

1. Please help users in clarification of the website's core functionalities (  $\geq 5$  ).
2. Create the image of software quality by nominating the assessment criteria of website (common qualities, process qualities, application - specific qualities).
3. Write down the users' requirements on the following aspects of website: functional, QoS, policy, system and organizational.
4. Separate the concerns accordingly to the following criteria: quality, time, view and size.
